ASSESSMENT TASK NOTIFICATION

Subject	Food Technology (Stage 5)
Topic	Food Product Development- Snack Founder
Class Teachers	Y. Whitfield, M.Hope and K.Collins
Head Teacher	D. Wait
Year	10
Date Given	Term 1: Week 6
Date Due	Practical Component Due: Term 1: Week ____ 2022 Theory Component Due: Term 1: Week 9: 2022
Weighting	20%

Assessment Task Outline

You are required to develop a new 'movie long' snack to entice movie guests and promote the movie. For this task you will be required to:

1. Design and produce (cook in class) a movie long snack that can be eaten at the movies. This snack food can either be a line extension or a me-too product.
2. Complete research questions that document the development of your snack, providing evidence of you applying the steps of the design process- design, produce and evaluate.

This will include:

- an evaluation of your movie snack product
- a plan for a suitable package
- a promotional marketing strategy for your product and the movie
- evaluating the nutritional and environmentally implications of consuming this product

You will need to read the design brief given to you by your teacher and complete each section of the theory task using the scaffold booklet. You can present your responses in the scaffold booklet or use scaffold responses as a draft to then present your information electronically using your own format.

Outcomes Assessed

FT5-11 Plans, prepares, presents and evaluates food solutions for specific purposes

FT5-13 Evaluates the impact of activities related to food on the individual, society and the environment

FT5-1 Demonstrates hygienic handling of food to ensure a safe and appealing product
